Period _____

Elements and Rhythm

Greeting/Thank You Card

This assignment is for you to create a greeting/Thank You card. Here are the guidelines you must follow.

- First, select an element of design.
- With the element you chose you'll need to choose a type of rhythm.
 - For example: If you included a bunch of balloons that are red blue and yellow, you might choose color as the element of design since you used a triadic color scheme. Then you would explain that with the balloons you also show rhythm through repetition through the circle shapes of the balloons or radiation if the balloons radiate outwards.
- Remember creativity and neatness are an important part of this assignment since a teacher will actually be receiving this card.
- Turn your greeting card in with this sheet and after it has been graded the card will be delivered to that teacher.
- Make sure the card has the teachers name and you sign your name somewhere so they know who it was from.
